Tools for the toughest demands

Precise sawing to go. CSC SYS 50 cordless table saw

The CSC SYS 50 cordless table saw is so compact that it fits into a Systainer. It also proves just as surprisingly versatile in use as tremendously convenient in its outer dimensions, with parallel cuts up to 280 mm, a cross cut width of up to 450 mm and angled cuts of -2° to 47° . Together with the UG-CSC-SYS underframe, you have the perfect worktable immediately on hand, and transport from the vehicle to the point of use thus succeeds effortlessly. In short: Precise sawing to go!

Uniquely compact. Extremely versatile.

So compact that it fits into a Systainer – you always have the CSC SYS 50 cordless table saw on hand, and will always achieve the quality you're used to from the workshop even when on the construction site. At the same time, it is impressively versatile, with parallel cuts up to 280 mm, a cross cut width of up to 450 mm and angled cuts of -2° to 47° .

festool.com/@577374

Precise cuts at the press of a button.

You can set the height and angle accurately to a tenth of a millimetre with unique digital operation – more exact than with any yardstick, with 100% repeat accuracy. Even the most demanding cuts will succeed with unprecedented precision with the robust stop system made up of a parallel side fence, angle stop and sliding table.

As powerful as if connected to the mains.

Even for rip cuts in solid wood, you won't notice any difference compared with mains-powered machines. The 2 x 18 V dual battery system in combination with the brushless EC-TEC motor will impress you with maximum power and torque.

Transport easily. Work conveniently. UG-CSC-SYS underframe

The UG-CSC-SYS underframe is ideally tailored to use with the CSC SYS 50 cordless table saw. You position the CSC SYS 50 securely on the worktop via suitable holes – and raise it to an ergonomic working height of 90 cm. Especially for long workpieces, the „shovel“ of the underframe offers a secure contact surface for rip and cross cuts.

Compact suction power without a cable. Perfected for your cordless tools. CTC MINI/MIDI cordless compact dust extractors

No worries about tripping.

It doesn't get any more mobile than this: Compact design, low weight, cordless rather than mains-powered machine. Your partner for the day, no need for a socket.

Powerful dust extraction with battery.

Impressive suction power: Comparable power to your corded extractor thanks to the 36 V turbine with 2 x 18 V battery packs.

Dust-free cordless systems.

Our compact onsite extractors fit perfectly into the Festool 18 V system. This ensures dust-free work for your cordless application. Additional benefit: More convenient and faster Bluetooth® autostart via a battery pack or remote control.*

*The Festool products with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

For carrying: The cordless extractor in the Systainer format.

CTC SYS cordless Systainer extractor

Mobile and independent.

The extractor that is easy to carry: Compact Systainer format, low weight and frees you from the constraints of electrical sockets. This makes it your perfect companion for service work and small tasks, as well as occasional spontaneous use.

Fits perfectly in the Systainer system.

Can be connected and combined. Also coordinated to your Festool cordless tools. The fast Bluetooth® autostart via a battery pack or remote control ensures extra convenience.*

Perfect energy suppliers:

The Festool energy sets are the ideal addition to your cordless extractor. The charger and battery packs are conveniently stored in a Systainer³ at all times.

➤ More information about all energy sets can be found here.

High-precision cross cuts. With battery power for the entire day. Cordless KAPEX KSC 60

The new KAPEX KSC 60 cordless sliding compound mitre saws produce unbeatable precise cross cuts in an enormous range of applications with mitre angles of up to 60° on each side and bevel angles of up to 46° or 47° on each side. The twin-column guide with two bearings ensures that the saw blade is guided smoothly and with precision whichever setting is chosen: This makes every cut perfect, without wobbles or juddering. In conjunction with the dual battery system, the brushless EC-TEC motor provides virtually unlimited endurance and is enough for all typical applications for an entire day's work.

Unbeatably precise cross cuts.

With mitre angles of up to 60° on each side and bevel angles of up to 46° or 47° on each side, the cordless KAPEX produces high-precision results and offers an enormous range of applications. Moreover, the twin-column guide with two bearings ensures that the saw blade is guided precisely, smoothly and safely, without wobbles or juddering.

Power: Uncompromising. Endurance: Unlimited.

In conjunction with the dual battery system, the latest generation brushless EC-TEC motor provides full power and maximum endurance.

**Typically Festool: Clever as a system.**

A perfectly coordinated system allows you to produce excellent results more reliably and in a healthier working environment. With saw blades for every application – thanks to the speed preselection with speed 100% adapted to the material – as well as a bevel for directly producing interior and exterior angles.

**Charges two at the same time:**

The TCL 6 DUO rapid charger. Now included in the scope of supply of the TSC 55 K cordless plunge-cut saw.

**Ideal for the TSC 55 K's 18 V dual battery system.**

On its two spaces, the DUO rapid charger always charges two battery packs at the same time.

18 volt cordless power.

Ready. With a portfolio like never before: comprehensive, customised, powerful.

Whether personal preferences or application-specific requirements, you will no doubt have certain standards for your tool. What if, instead of trying to find endless compromises, a solution existed that combined everything into one and made everyday work noticeably easier? Our cordless portfolio takes account of precisely these preferences:

**You can now work dust-free
with the entire cordless system.**

**Unique: Three-year warranty for battery
packs and chargers too.***

*This may differ per country. Please contact your local dealer for further information.

Worlds apart. The benchmark in sawing. TS 60 K plunge-cut saw

Festool plunge-cut saws have been setting the standard for saws for decades. The TS 60 K is redefining this yet again. In the blink of an eye, the unique KickbackStop protects your workpiece and minimises the risk of injury. Perfectly coordinated with the entire Festool saw system and with a cutting depth of 60 mm, the most versatile saw of its kind guarantees you premium work results. Of course, this is also the case for mitre cuts and solid worktops.

KICKBACKSTOP
TS 60 K

One saw for every task.

The TS 60 K is our most versatile plunge-cut saw. With its 60 mm cutting depth and compact design, it offers premium results even when working with mitre cuts and solid worktops. A further benefit: The entire accessory system can be used, and the TS 60 K can even be combined with the cross cutting guide rail – a ground-breaking improvement to your daily work.

Protects against dangerous kickbacks.

Our best plunge-cut saw is now even safer: The unique KickbackStop protects your workpiece and also minimises the risk of injury. The TS 60 K is a high-precision, safe plunge-cut saw designed for you and your team – and for excellent results.

Saws like a hot knife through butter.

Robust and sophisticated down to the very last detail, the TS 60 K is sure to impress across the board. The latest-generation brushless EC-TEC motor is virtually maintenance-free and extremely powerful. The high speed ensures ideal machining, an effortless feed rate and, as a result, the best cutting quality.

Unlimited power. On all substrates. RG 130 ECI surface-restoration grinder

Perfect substrate preparation is the prerequisite for a perfect result. With the RENOFIX RG 130 ECI surface-restoration grinder, you have a powerful and absolutely reliable helper for removing old coatings and adhesive residue on your side. The brushless EC-TEC motor thus finally allows you to work without interruptions with the maximum service life. In combination with the CTM 36 AC RENOFIX mobile dust extractor, you ensure healthy working – good for you and your customers.

Excellent service life.

Its extremely robust, resilient gear box and the highly efficient, brushless EC-TEC motor make the RG 130 ECI surface-restoration grinder extremely durable – with minimal downtime.

Healthy working with a system.

In combination with the CTM 36 AC RENOFIX mobile dust extractor and the CT-VA pre-separator, the surface-restoration grinder guarantees low dust levels while working.

Unlimited power.

The brushless EC-TEC motor of the RG 130 ECI performs impressively with outstanding, constant power without overheating. Having so much power allows you to achieve the perfect substrate in no time at all – effortlessly and without interruptions.

**Tool underneath and accessories on top.**

Cordless drill in the Systainer³ with lid compartment and bit/drill bit case

The right accessory is always there in the Systainer³ with lid compartment. The compartment can be freely divided and equipped with the compatible BKS SYS3 cassettes.

From January 2023 the following cordless products come in the Systainer³ with lid compartment including a high-quality bit/drill bit case:

- › Set variants of the C 18, T 18 and TDC 18/4 cordless drills, and the TPC 18/4 cordless percussion drill
- › T 18/PSC 420 site set
- › Plus version of the BHC 18 cordless hammer drill
